THE CYBER THREAT

Cyber criminals are targeting all businesses, including yours. Without protections, you can expect your company to succumb to a variety of costly cyber-attacks including ransomeware, phising, email comprimise, vulnerability exploits, or any number of other attacks.

You don't have to be a victim. Stand strong with our specially crafted cyber-shields packages that repel the criminals from your data and computer systems.

TECHNOLOGY GROUP

COMPANY SHIELD

WHAT IT DOES

Cybercriminals often try to hide their activities by attacking points in your technology infrastructure that change often or are rarely checked. Our company shield not only reviews your infrastructure such as public DNS, domain settings, server configurations and Microsoft 365 environment, but we document it daily and review it for changes that indicate unwanted activity.

We will also perform monthly external vulnerability scans on your website and network to find any holes attackers may try to use to infiltrate your systems. Don't leave the security of your company's IT environment to chance. Leave it to us, and rest assured someone is watching over you.

WHAT IT INCLUDES

- Infrastructure Monitoring and Documentation

- Company Cybersecurity Platform

WHY YOU'LL LOVE US

- We resolve issues down to the root cause
- Our staff stays abreast of the changes in the tech world to keep you safe
- We don't only get to know your IT environment, we also get to know you
